**Modeling workplan.doc**

We're schedule to meet at 1:30 on Tuesday, Jan 18 at the DEQ office at 2020 SW 4th St (4th Floor). I'm not aware that anyone is calling in - so let me know if that's wrong.

Here's a proposed agenda. Send a Reply to All if you have additions or refinements to suggest.

**AGENDA**

1:30 - 2:00 Recent Changes to Stormwater Model  
Bruce will describe changes he made to the stormwater model to more accurately represent the river's flow velocity and how these changes appear to affect the outcome (i.e., stormwater impact to the river).

2:00 - 2:30 Review/Revise Modeling Workplan  
The attached document was generated last August. We'll review it to determine whether it still meets our needs.

2:30 - 4:00 Stormwater Model Data Needs  
We need to figure out how we convert stormwater loading data into data Bruce can be use as input for the model. [I imagine we'd want to approach this in the same way regardless of whether we are using the data for the stormwater model or the "hybrid" model.]
